

Seals for commercial doors

Revolving and sliding glass doors

Kleeneze Sealtech provides a range of seals for revolving, sliding and hinged doors for the entrances of commercial buildings. Seals can be provided with self adhesive fixing or finished to complement existing site architecture.

Brushstrip is not only effective in sealing against draughts, but helps prevent dirt and dust entering foyer areas.

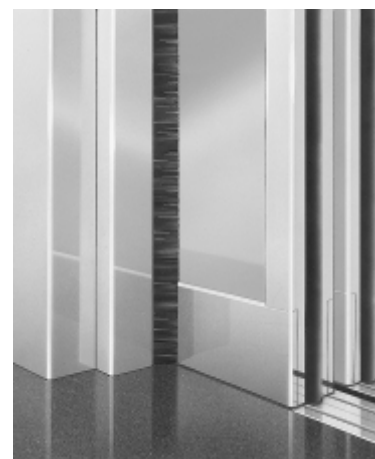

Revolving door seals

Brushstrip sealing kits are manufactured to customer specification to suit all types of revolving doors with either wood, metal or aluminium frames.

Sealing kits comprises top, bottom, side and corner sections for each door panel. Brushstrip are available in hardwearing horsehair or nylon fill, trimmed to suit the door clearance

Specially trimmed corner sections

Sliding or hinged glass doors

Brushstrip seals are available to suit all sizes of hinged and sliding glass entrance doors. Supplied in standard lengths or cut and finished to your requirements.

Self adhesive backed seals for the centre of swing glass doors

Threshold seals for swing and sliding glass doors
