

SUPERSEAL

Seals for industrial doors

Sliding and hinged doors

SUPERSEAL brushstrip provides an effective solution for the demands and rigours of industrial sliding and hinged doors. From corrugated and fabricated surfaces through to stone, brickwork and uneven ground surfaces, brushstrip provides a durable and flexible seal.

HOW TO SPECIFY

Refer to the illustration guides to determine the type of seal required. Select the size of seal according to the width of gap to be sealed.

Seals should be fitted with the tips of the filaments in firm contact with the mating surface, but barely flexed.

SUPERSEAL 180°, ALSO AVAILABLE IN 45° AND 90° FLANGE

SUPERSEAL

Seals for industrial doors

Roller and garage doors

Gaps around roller doors are effectively sealed using clip-on Rollaseal™, preventing draughts, vermin and door rattle within the guide channels. To complete the all round seal, use Bumperseal along the bottom rail and Superseal 180° across the lintel.

ROLLASEAL
