SUPERSEAL

Seals for internal and external doors

External doors

Gaps around external doors are a major cause of heat loss. Fitting Superseal not only makes the home or workplace warmer, it is environmentally friendly by helping reduce greenhouse gases. The Superseal range for domestic doors includes seals, thresholds and letterbox openings.

Features

- Products conform to draughtstrip performance standard BS7386 Class 1 (where applicable)
- Approved by the Government Home Energy Efficiency Scheme
- Simple retrofit
- All seals supplied complete with fixings.

Threshold seals

Brushstrip in upright carrier, 914mm

H612AL1388

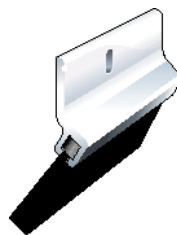

Aluminium carrier, black brush

H612PV0101

White PVC carrier, black brush

SUPERSEAL

Seals for internal and external doors

Internal doors

Although it is accepted that external doors need to be sealed against cold air from outside, it is not widely appreciated that there are considerable benefits from reducing air flow from room to room.

Threshold seals

Brushstrip in upright carrier, 914mm

H612AL1388

Aluminium carrier, black brush

H612PV0101

White PVC carrier, black brush

H612PV0111

Brown PVC carrier, black brush

Edge seals

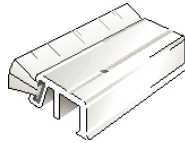

Pile seal in box section carrier, 2030mm

H612PV1604AW

White PVC carrier, white pile

H612PV1605AB

Brown PVC carrier, brown pile

Centre door seals

Brushstrip seal in rebated carrier, 2100mm
Designed to seal the centre and outer edges
of double swing doors.

Press fit into 5mm x 12mm groove

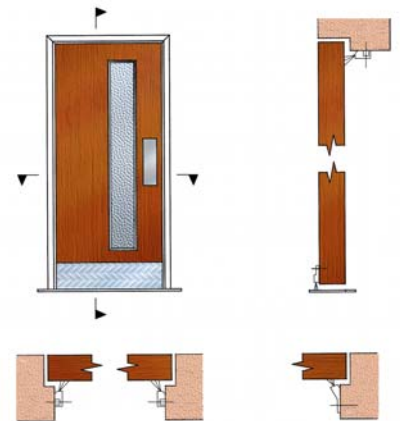

H612AL1571

Aluminium carrier, 10mm black brush

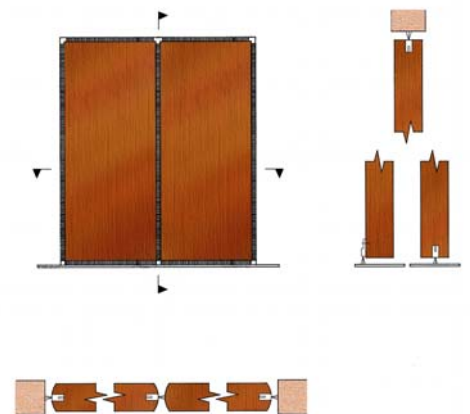

Features

- Products conform to draughtstrip performance standard BS7386, Class 2 (where applicable)
- Approved by the Government Home Energy Efficiency Scheme
- Simple retrofit
- All seals supplied complete with fixings.

Internal single timber door

External double timber door
