

SUPERSEAL

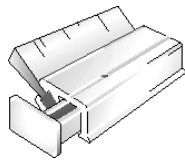

Seals for windows

The complete sealing system

Gaps around windows are responsible for a large proportion of domestic heat loss. The **SUPERSEAL** range includes brush, weather pile, compression and sealant products to seal all styles of timber and metal windows.

Features

- Products conform to draughtstrip performance standard BS7386 Class 2 (where applicable)
- Approved by the Government Warmfront Scheme
- Simple retrofit
- Excellent compression recovery
- All seals supplied complete with fixings.

BRUSHSTRIP SEALS

Brushstrip seal in box section carrier, 2030mm, complete with end caps
Gap seal <6mm

H612PV1462

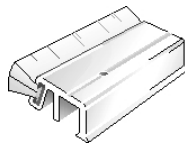

White PVC carrier, white brush

H612PV4637

White PVC carrier, black brush

H612PV1464

Brown PVC carrier, black brush

PILE SEALS

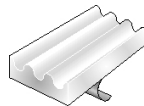

Pile seal in box section carrier, 2030mm
Gap seal <3mm

H612PV1604AW

White PVC carrier, white pile

H612PV1605AB

Brown PVC carrier, brown pile

COMPRESSION SEALS

E profile EPDM self adhesive seal
9mm x 3mm, gap seal <2.5mm

H640CS00E1

White, 100m roll

H640CS00E1

Brown, 100m roll

P profile EPDM self adhesive seal
9.5mm x 5mm, gap seal <5mm

H640CS00P1

White, 100m roll

H640CS00P3

Brown, 100m roll

Silicone 'O' tube,
(fix with silicone adhesive)

H640CS00N4

White 4.5mm diameter, 100m roll

H640CS00N5

White 5.5mm diameter, 100m roll

H640CS00N1

White 7.5mm diameter, 100m roll

H640CS00N6

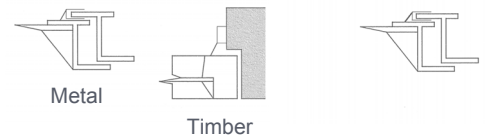

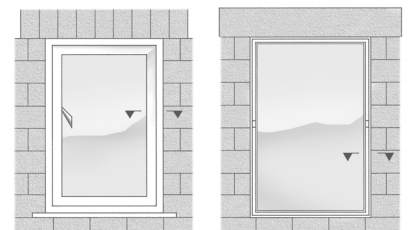

White 10.5mm diameter, 25m roll

Polypropylene pile seal, self adhesive
7mm x 6mm, gap seal <5mm

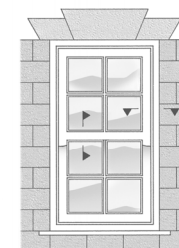

H640CS00B4

Grey, 325mm roll

Casement window

Metal pivot window

Timber sash window

SUPERSEAL

Seals for windows

Silicone HM sealant

A high modulus silicone polymer sealant with excellent adhesive properties and fast curing time, skinning in only 5 minutes.

Silicone HM sealant has wide range of uses, including waterproofing, general draughtproofing and sealing around work areas.

H660SLHM01

Clear, 330ml
Box quantity: 25

Polyurethane GPS 92 sealant

A versatile, moisture curing, one part polyurethane sealant and adhesive. GPS92 has a wide range of commercial uses from bonding of light building components to automotive panels.

Easily applied, GPS92 produces no obnoxious fumes, metals may not require priming and the cured seal can be over-painted. Tack free time is between 30 - 60 minutes, ensuring low dirt pick-up.

Use in conjunction with **PRA91** release agent for gasket sealing of windows and panels.

H660SL0016

White, 330ml
Box quantity: 12

Estimated linear metres per 330ml tube

3mm sealant bead - 32m

6mm sealant bead - 8mm
