

ELEVATOR GUARD

Safety in motion...

Elevator Guard can provide an effective and aesthetic solution to the problem of small fingers and being trapped in sliding elevator doors. The fact that children like press their hands against glass doors has led to incidents of entrapment when the doors open

By installing Elevator Guard and reducing the gap, the risk is significantly reduced. Elevator Guard is also an effective cold smoke seal and can help reduce wind noise and heat loss in lobby areas.

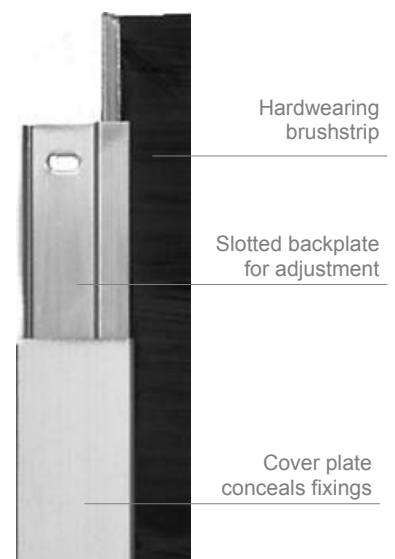

Available in two sizes, Elevator Guard is supplied complete with a cover plate to conceal fixings and co-ordinate with surrounding finishes.

Elevator Guard reduces the risk of finger entrapment on elevator doors.

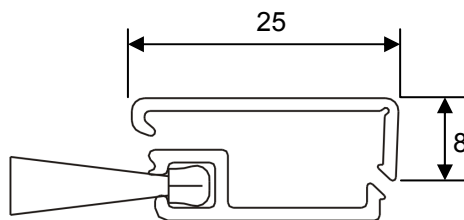

Features

- Aesthetic cover plate conceals fixing screws
- Simple to fit
